## Screen Moxie Liquid Glass Screen Protection

Screen Moxie is the world's best glass screen protector. A revolutionary product that contains pure, particle free, silicon dioxide –  $\text{SiO}_2$  – “pure liquid glass”. The glass is in a molecular form and is held in a liquid. It transforms to a solid state and provides a seamless protective coating when it dries.

This forms the base of this proprietary formulation. The nano-coating contained in Screen Moxie not only protects the device from surface damage and is extremely scratch resistant, Screen Moxie also acts as a water repellent and provides 12 months of antibacterial protection!

Multiple studies have found smartphones, tablets and other electronic devices harbor various undesirable viruses and other illness causing microbes, but a screen coated in Screen Moxie helps stop bacteria from bonding themselves to the surface. Recent independent laboratory tests attest to more than 99.9% of bacteria being eliminated over time with the use of Screen Moxie!

And that's not all! If a user's screen breaks in the first 12 months while protected with Screen Moxie, they will pay for the repair, up to \$350.

Product Features:

- 9h hardness – comparable to... [Read the rest @ myvoicecomm.com ...](#)
